CCJ: WOODMEAD SOLAR CAR PORT & PARKING PROJECT - UPDATE

Monday 12 January 2026

Dear Members,

We would like to share a further update on the ongoing Woodmead Parking Project.

We are pleased to confirm that paving in Zones 1 and 2 was completed towards the end of 2025, and the installation of the solar panels in these areas has commenced and remains ongoing.

Please note that these areas remain open for parking, with work taking place while the solar installation is underway. Members are kindly asked to follow all signage and staff directions while parking in these zones.

From tomorrow, Tuesday 13 January, paving work will begin in Zone 3, as depicted in the accompanying image. To facilitate this work, hoarding will be installed today, and Zone 3 will be closed from tomorrow.

Image 1: Zones

Image 2: Current view of parking area

A narrow access route will remain open through this area for golf carts and access to the field. Members making use of the field are encouraged to park in the grass overflow parking area for the most convenient access. Golfers are also reminded that parking is available at the Pool area, with access via Rocklands 1st Hole.

We thank you for your continued patience and cooperation as this important project progresses. These works form part of a long-term investment in improved infrastructure and sustainability at Woodmead, and we appreciate your understanding as we move through each phase.

Warm regards,
Charmaine Klug-Price
Woodmead Club Manager
